POUCH MAIL

RE: Our File 582-797 DIV USSR
PM No. 620

Dear Les:

We have received an Official Action in the above case and enclose a copy of the translation of the same. We do not provide a copy of the U.S. Patent 3,575,178 cited by the Committee since they did not send us one, but we assume that you already have one, but if you do not you can obtain one very readily. On the other hand, if you need a copy of the reference, please telephone me and I will arrange to send you one from the Library here in New York.

In connection with the Action, the Committee apparently requires that we submit a new main claim and I should appreciate having any comments you may have concerning claims proposal.

Reply to the Action should be filed not later than January 8, 1977 and accordingly, we would like to have your instructions at your earliest convenience.

Very truly yours,

George J. Brandt, Jr.
